

## Experiment 5 — View and hierarchy results

### 🔗 Department salary summary view

The view returns the same five-row department summary shown in Experiment 3.

### Employee hierarchy view

| Hierarchy level                  | Number of employees |
|----------------------------------|---------------------|
| 0 — top level                    | 1                   |
| 1 — direct reports to Asha Mehta | 5                   |
| 2 — remaining staff              | 24                  |

### View updatability test

| Test                                                       | Output                                                                                            |
|------------------------------------------------------------|---------------------------------------------------------------------------------------------------|
| Attempt to update <code>v_department_salary_summary</code> | Rejected because an aggregate / <code>GROUP BY</code> view is not updatable.                      |
| Update <code>v_employee_directory</code>                   | Succeeds: employee 30's email temporarily becomes <code>zoya.mirza+view-test@example.com</code> . |
| Restore                                                    | Employee 30's email is restored to <code>zoya.mirza@example.com</code> .                          |

### Reporting chain for employee 30

| Distance from employee | Employee    |
|------------------------|-------------|
| 2                      | Asha Mehta  |
| 1                      | Leena Menon |
| 0                      | Zoya Mirza  |
